Subnetting Speed Kit — Brain-dump sheet

Set a 60-second timer. Rebuild the chart from memory, then check the method sheet.

Attempt 1 Time: _____ s

bit value								
mask octet								
block size								
prefix, 4th octet								
prefix, 3rd octet								
prefix, 2nd octet								

Attempt 2 Time: _____ s

bit value								
mask octet								
block size								
prefix, 4th octet								
prefix, 3rd octet								
prefix, 2nd octet								

Use it: five quick ones

Pick any address and prefix (or take them from a drill set), and fill the line from your chart.

Address / prefix	Network	Broadcast	Usable range

The filled chart is on the method sheet and in the guide at subnetcalculator.dev/blog/how-to-get-fast-at-subnetting/.
